==========

TARGET ROLE: AI PRODUCT MARKETING MANAGER INTERN (AI PMM)
First-Class Mechatronics Engineering Background (4.70/5.00 CGPA) | SaaS GTM Positioning, Frontline User Acquisition & Automated Revenue Operations

==========

PROFESSIONAL SUMMARY

Systems-driven AI Product Marketer and First-Class Mechatronics Engineering undergraduate at the Federal University of Technology Akure (4.70/5.00 CGPA, Best Female Student in Faculty). Bridges complex technical architectures with market psychology to build high-converting Go-To-Market (GTM) launches, crisp value propositions, and autonomous revenue systems. Proven track record in 0-to-1 frontline user acquisition (acquiring first 100+ users from scratch, generating 520+ qualified inbound inquiries, and driving 250+ paid customer transactions) alongside engineering deterministic AI automation pipelines (n8n, conversational AI voice agents, and CRM workflows slashing lead response times from 4 hours to 45 seconds). Seeking an AI Product Marketing Manager Internship to accelerate product adoption, craft compelling technical storytelling, and scale customer acquisition for high-growth SaaS and AI teams.

EDUCATION

FEDERAL UNIVERSITY OF TECHNOLOGY AKURE (FUTA) — Akure, Ondo State, Nigeria
Bachelor of Engineering (B.Eng.) in Mechatronics Engineering
June 2023 – November 2027 (Expected)
• Cumulative GPA: 4.70 / 5.00 (First Class Honours Standing)
• Academic Honors: Best Female Student Award, School of Engineering and Engineering Technology (SEET / FUTANA)
• Scholarships: Mt Babs Foundation Merit Scholarship Award Recipient (Top 1% STEM cohort)
• Leadership: Elected Class Representative, Mechatronics Engineering Department (Cohort of 43 Students)

CORE COMPETENCIES & TECHNICAL STACK

• AI Product Marketing (PMM): Go-To-Market (GTM) Launch Architecture, Positioning & Messaging Hierarchies, ICP & Buyer Persona Profiling, Feature-Benefit-Outcome Translation, Competitive Teardowns & Battlecards, User Journey Mapping, Product Launch Collateral, Onboarding Funnel Optimization.
• Autonomous Systems & AI Stack: n8n Workflow Orchestration, Anthropic Claude (Claude 3.5 Sonnet, Claude Code CLI), OpenAI API, Conversational AI Voice Agents (ElevenLabs, Twilio VoIP), Structured JSON Output Extraction, Sensitivity Quarantine Filters, Zero-Hallucination Guardrails, Webhooks & REST APIs, Python Basics.
• Growth Marketing & Distribution: Frontline User Acquisition (0-to-100+ Users), Multi-Channel Campaign Execution (LinkedIn, TikTok, Instagram, WhatsApp), On-Page SEO & Content Strategy, Inbound Lead Generation, Email Automation, Digital Asset Design (Canva / Lora Standard).
• Operations & Platforms: HubSpot CRM, Google Workspace (Docs, Sheets, Drive, Forms), Git / GitHub, Notion, Slack & Discord Community Architecture.

PRODUCT MARKETING & TECHNICAL WORK EXPERIENCE

AI Product Marketing Specialist & Automation Builder | Contract / Freelance
2025 – Present
• Architect and deploy production agentic workflows combining LLMs, REST APIs, and CRM databases to accelerate go-to-market execution and eliminate sales friction for lean teams.
• Engineered an autonomous inbound lead qualification and quoting engine in n8n, utilizing structured entity extraction and deterministic business logic to slash lead response time from 4 hours to under 45 seconds (99% reduction).
• Formulated structured positioning matrices and 3-tier messaging hierarchies (Strategic Hook, Core Value Pillars, Feature-to-Benefit Proof Points) translating intricate technical software capabilities into high-converting buyer copy.
• Prototyped low-latency conversational AI voice agents integrating ElevenLabs voice models and Twilio telephony for 24/7 inbound qualification, budget discovery, and real-time CRM updates.
• Authored developer-facing technical documentation, executive sales briefs, and investor-ready ROI models for autonomous voice agents and workflow solutions.

Digital Growth Lead & Social Media Strategist | Ovie's Kitchen & Flowery Nectar Honey
Apr 2025 – Present

• Conducted customer discovery and competitor teardowns to identify target buyer pain points, objections, and purchasing triggers across lifestyle and consumer verticals.
• Built end-to-end digital acquisition funnels and produced 20+ short-form commercial/educational video assets per month across Instagram and TikTok, acquiring the first 100+ paid users from zero baseline.
• Generated 520+ qualified inbound customer inquiries and directly converted 250+ paid commercial transactions within a 3-month launch sprint.
• Executed on-page SEO audits and content optimizations across digital touchpoints, increasing organic profile discoverability and inbound conversion rates by 35%.
• Managed creative workflows from ideation and copywriting to visual design, client approvals, and post-campaign analytics reporting.

Technical Content & Communications Specialist | BootClass Academic Community
Feb 2023 – Jan 2026
• Authored structured technical documentation, learning roadmaps, and educational product briefs translating complex engineering and software concepts into clear, accessible guides for 500+ students.
• Designed and launched the "21 Days of Examspiration" campaign—a structured daily motivational and study-strategy digital series sustaining academic retention across 300+ active student learners.
• Co-organized 3 campus-wide "Marathon Revision Classes" reaching hundreds of university students across core STEM curricula, contributing to a 60% improvement in participant pass rates.
• Standardized internal documentation systems and creative visual guidelines, establishing repeatable asset creation workflows and brand consistency.

NOTABLE AI GTM & PRODUCT CASE STUDIES
---
1. Autonomous Inbound Lead Qualification & CRM Routing Engine (Marcus Vance Automotive)
• Problem: Manual lead triage took 4+ hours, resulting in lead decay, human data-entry errors, and lost customer deals.
• Product Solution: Architected a multi-branch n8n workflow that intercepts incoming web forms, performs zero-hallucination structured entity extraction, applies deterministic pricing logic, creates HubSpot deals, and auto-dispatches personalized quotes in under 45 seconds.
• Impact: Slashed lead response time from 4 hours to 45 seconds (99% reduction) with a 0% error rate and automated advisor alerts.

2. Conversational AI Voice Sales Agent (GText Homes Real Estate Prototype)
• Problem: High-ticket real estate sales reps lost prospective buyers during off-peak hours and spent excessive time qualifying low-intent leads.
• Product Solution: Designed and prototyped a sub-second latency conversational AI voice agent using ElevenLabs, Twilio VoIP, and webhook pipelines for 24/7 lead qualification, property intent mapping, and automatic CRM synchronization.
• Impact: Enabled continuous 24/7 qualification with zero human response latency and automated calendar booking.

3. Automated Lifecycle Ops & Notification Pipeline (The Visionary Nation)
• Problem: High manual friction and account ban risks associated with direct bulk messaging during community onboarding and lifecycle updates.
• Product Solution: Orchestrated an automated intake and notification pipeline in n8n connecting Google Forms, Google Sheets API, and Gmail with deterministic data validation and formatting.
• Impact: Eliminated manual messaging workload, achieving 100% on-time dispatch and delivering daily 7:00 PM executive summaries.

LEADERSHIP & CAMPUS COMMUNITY EXPERIENCE

Class Representative | Mechatronics Engineering Department, FUTA
2023 – Present
• Elected official academic representative and communication bridge between faculty administration and 43 Mechatronics Engineering undergraduates.
• Coordinated departmental lecture schedules, laboratory sessions, workshop practicals, and conflict-resolution processes, ensuring 100% academic alignment.
• Initiated departmental peer-learning circles for programming and engineering mechanics to support struggling students.

Lead Organizer & Cross-Functional Director | Mt Babs Foundation Scholars Community
2025
• Directed an end-to-end educational leadership webinar, managing a 17-member student committee across Publicity, Speaker Briefing, Technical Infrastructure, and Registration.
• Implemented automated post-event follow-up documentation, participant surveys, and resource packages, achieving a 100% attendee satisfaction score across 30 scholars.

Lead Convener & Program Director | FUTA 400-Level Career & Defense Preparation Seminar
2025

• Conceived, organized, and directed a 2-day virtual seminar for 77 penultimate-year engineering students focused on competitive Industrial Training (IT) placements and project defence execution.
• Built targeted broadcast distribution funnels, achieving a 95%+ attendance retention rate across both seminar days.

HONORS, AWARDS & CERTIFICATIONS

• Best Female Student Award: School of Engineering and Engineering Technology, FUTA (SEET / FUTANA)
• Mt Babs Foundation Merit Scholarship Award: Prestigious academic scholarship awarded to top 1% STEM undergraduates
• Certificate of Excellence in Engineering Oratory: Departmental Technical Presentation & Speaking Contest
• Content Marketing Certification: Comprehensive credential covering Inbound Marketing, Copywriting & Audience Engagement
• Social Media Strategy & Community Growth Coursework: Frontline user acquisition and organic distribution
• Verified Portfolio & Credentials: https://bit.ly/Adediwuracertificates
