==========

TARGET ROLE: AI PRODUCT MARKETING MANAGER INTERN (AI PMM)
First-Class Mechatronics Engineering Background (4.70/5.00 CGPA) | Autonomous Product Marketer & RevOps Automation Builder

==========

PROFESSIONAL SUMMARY

Autonomous, systems-driven AI Product Marketer and First-Class Mechatronics Engineering undergraduate at the Federal University of Technology Akure (4.70/5.00 CGPA, Best Female Student in Faculty). Defined by extreme ownership and end-to-end execution—trusted by founders and cross-functional teams to take complete charge of a project from strategy and creative asset production to launch, scheduling, and conversion. Track record includes reporting directly to founders to resurrect year-long dormant brand channels, acquiring their first online customers from scratch, generating 520+ qualified inbound inquiries, and driving 250+ paid customer transactions. Combines creative distribution with technical orchestration: builds deterministic n8n automation pipelines, conversational AI voice agents, and CRM workflows that slash lead response times from 4 hours to 45 seconds. Seeking an AI Product Marketing Manager Internship to take autonomous ownership of product positioning, technical storytelling, and user acquisition funnels.

EDUCATION

FEDERAL UNIVERSITY OF TECHNOLOGY AKURE (FUTA) — Akure, Ondo State, Nigeria
Bachelor of Engineering (B.Eng.) in Mechatronics Engineering
June 2023 – November 2027 (Expected)
• Cumulative GPA: 4.70 / 5.00 (First Class Honours Standing)
• Academic Honors: Best Female Student Award, School of Engineering and Engineering Technology (SEET / FUTANA)
• Scholarships: Mt Babs Foundation Merit Scholarship Award Recipient (Top 1% STEM cohort)

• Leadership: Elected Class Representative, Mechatronics Engineering Department (Cohort of 43 Students)

CORE COMPETENCIES & TECHNICAL STACK

• Product Marketing & GTM Execution: End-to-End Campaign Ownership, 0-to-1 User Acquisition, Value Proposition Design, ICP & Buyer Persona Profiling, 3-Tier Messaging Hierarchies, Competitive Teardowns & Battlecards, Feature-to-Benefit Translation, Onboarding & Conversion Funnel Optimization.
• AI Systems & Automation Stack: n8n Workflow Orchestration, Anthropic Claude (Claude 3.5 Sonnet, Claude Code CLI), OpenAI API, Conversational AI Voice Agents (ElevenLabs, Twilio VoIP), Structured JSON Output Extraction, Sensitivity Quarantine Filters, Zero-Hallucination Guardrails, Webhooks & REST APIs, Python Basics.
• Creative Production & Distribution: End-to-End Content Ownership (Ideation, Copywriting, Design, Video Production, Scheduling), Short-Form Commercial Video (CapCut, TikTok Studio), Carousel & Visual Asset Design (Canva / Lora Standard), Multi-Channel Distribution (LinkedIn, Instagram, TikTok, WhatsApp), Profile SEO & Visibility Optimization.
• Operations & Platforms: HubSpot CRM, Google Workspace (Docs, Sheets, Drive, Forms), Meta Business Suite, Airtable, Notion, Git / GitHub, Slack & Discord Community Architecture.

PRODUCT MARKETING & TECHNICAL WORK EXPERIENCE

Digital Growth Lead & Social Media Strategist | Ovie's Kitchen & Flowery Nectar Honey
May 2025 – Present
• Reported directly to the founder, exercising complete autonomous ownership of marketing operations—from strategic ideation (determining what to create, static graphics vs. short-form video) to end-to-end design, video production, copywriting, and multi-channel scheduling.
• Reactivated a dormant brand account that had been inactive for an entire year; revamped visual aesthetics, messaging, and search discoverability to establish immediate brand credibility.
• Acquired the brand's very first online customers from scratch, generating 520+ qualified inbound buyer inquiries and directly converting 250+ paid commercial transactions within a 3-month launch window.
• Increased overall social engagement by 50% across 3 managed accounts within 5 months through consistent, value-driven storytelling and audience interaction.

• Tracked performance analytics and audience sentiment loops to continuously refine content funnels, improving profile discoverability and inbound conversion rates by 35%.

AI Product Marketing Specialist & Automation Builder | Contract / Freelance
2025 – Present
• Architect and deploy production agentic workflows combining LLMs, REST APIs, and CRM databases to accelerate SaaS GTM execution and eliminate manual sales friction for lean teams.
• Engineered an autonomous inbound lead qualification and quoting engine in n8n, utilizing structured entity extraction and deterministic business logic to slash lead response times from 4 hours to under 45 seconds (99% reduction) with a 0% error rate.
• Formulated full-funnel positioning matrices and 3-tier messaging hierarchies (Strategic Hook, Core Value Pillars, Feature-to-Benefit Proof Points) translating intricate technical architectures into high-converting buyer copy.
• Prototyped low-latency conversational AI voice agents integrating ElevenLabs voice models and Twilio telephony for 24/7 inbound qualification, budget discovery, and real-time CRM updates.
• Authored developer-facing technical documentation, executive sales briefs, and investor-ready ROI models for autonomous voice agents and workflow solutions.

Content Operations & Technical Communications Specialist | BootClass Academic Community
Feb 2024 – Present (Volunteer from Feb 2023)
• Led cross-functional content operations, directing Graphic Designers and Video Editors to ensure on-brand, high-performing assets across LinkedIn, Instagram, and Facebook.
• Authored technical documentation, learning roadmaps, and educational product briefs translating complex engineering and software concepts into clear, accessible guides for 500+ students.
• Designed and launched the "21 Days of Examspiration" campaign—a structured daily motivational and study-strategy digital series sustaining academic retention across 300+ active student learners.
• Co-organized 3 campus-wide "Marathon Revision Classes" reaching hundreds of university students across core STEM curricula, contributing to a 60% improvement in participant pass rates.

Community Manager | Akure Mechatronics Community
Aug 2023 – Jan 2025
• Owned community engagement and content programming for robotics, machine learning, and CAD modelling enthusiasts, generating 50+ ideas and discussions per session.

• Drove community activation that increased physical workshop and training turnout by 20%.
• Moderated monthly technical Twitter (X) Spaces, coordinating guest speakers and technical discussions.

Content Writer (Remote) | HerAbility Hub
July 2023 – Jan 2024
• Owned weekly LinkedIn content production (2-3 in-depth articles per week, 500+ words each), driving brand voice and thought leadership.
• Implemented user-generated content (UGC) campaigns that boosted organizational visibility and audience reach by 50%.

NOTABLE AI GTM & PRODUCT CASE STUDIES
---
1. Autonomous Inbound Lead Qualification & CRM Routing Engine (Marcus Vance Automotive)
• Problem: Manual lead triage took 4+ hours, resulting in lead decay, human data-entry errors, and lost customer deals.
• Product Solution: Architected a multi-branch n8n workflow that intercepts incoming web forms, performs zero-hallucination structured entity extraction, applies deterministic pricing logic, creates HubSpot deals, and auto-dispatches personalized quotes in under 45 seconds.
• Impact: Slashed lead response time from 4 hours to 45 seconds (99% reduction) with a 0% error rate and automated advisor alerts.

2. Conversational AI Voice Sales Agent (GText Homes Real Estate Prototype)
• Problem: High-ticket real estate sales reps lost prospective buyers during off-peak hours and spent excessive time qualifying low-intent leads.
• Product Solution: Designed and prototyped a sub-second latency conversational AI voice agent using ElevenLabs, Twilio VoIP, and webhook pipelines for 24/7 lead qualification, property intent mapping, and automatic CRM synchronization.
• Impact: Enabled continuous 24/7 qualification with zero human response latency and automated calendar booking.

3. Automated Lifecycle Ops & Notification Pipeline (The Visionary Nation)
• Problem: High manual friction and account ban risks associated with direct bulk messaging during community onboarding and lifecycle updates.

• Product Solution: Orchestrated an automated intake and notification pipeline in n8n connecting Google Forms, Google Sheets API, and Gmail with deterministic data validation and formatting.
• Impact: Eliminated manual messaging workload, achieving 100% on-time dispatch and delivering daily 7:00 PM executive summaries.

LEADERSHIP & CAMPUS COMMUNITY INITIATIVES

Lead Organizer & Cross-Functional Director | Mt Babs Foundation Scholars Community
2025
• Exercised end-to-end operational ownership over a flagship educational leadership webinar, directly managing and coordinating a 17-member student committee across 5 divisions: Publicity & Marketing, Speaker Engagement, Technical Operations, Registration & Documentation, and Seminar Coordination.
• Enforced accountability, ran speaker briefings and technical dry runs, and ensured zero-downtime virtual execution, delivering a 100% attendee satisfaction score across 30 tertiary scholars.

Lead Convener & Program Director | FUTA 400-Level Career & Defense Preparation Seminar
2025
• Independently conceived, organized, and directed a 2-day virtual seminar for 77 penultimate-year engineering students focused on competitive Industrial Training (IT) placements and research defences.
• Built targeted broadcast distribution funnels, sustaining a 95%+ attendance retention rate across both seminar days.

Class Representative | Mechatronics Engineering Department, FUTA
2023 – Present
• Elected official academic representative and communication bridge between faculty administration and 43 Mechatronics Engineering undergraduates.
• Coordinated departmental lecture schedules, laboratory sessions, workshop practicals, and conflict-resolution processes, ensuring 100% academic alignment.
• Initiated departmental peer-learning circles for programming and engineering mechanics to support struggling students.

HONORS, AWARDS & CERTIFICATIONS

• Best Female Student Award: School of Engineering and Engineering Technology, FUTA (SEET / FUTANA)
• Mt Babs Foundation Merit Scholarship Award: Prestigious academic scholarship awarded to top 1% STEM undergraduates
• Certificate of Excellence in Engineering Oratory: Departmental Technical Presentation & Speaking Contest
• Certificate of Excellence at NUESA Oratory Contest: Nigerian Universities Engineering Students' Association
• Most Social Volunteer Award: BootClass Community Honors (Session 2023/2024)
• Content Marketing Certification: HubSpot Academy (Inbound Marketing, Copywriting & Audience Engagement)
• Social Media Strategy & Community Growth Coursework: Frontline user acquisition and organic distribution
• Verified Portfolio & Credentials: https://bit.ly/Adediwuracertificates
